UVA Health | Claude Moore Health Sciences Library

Exhibit Materials

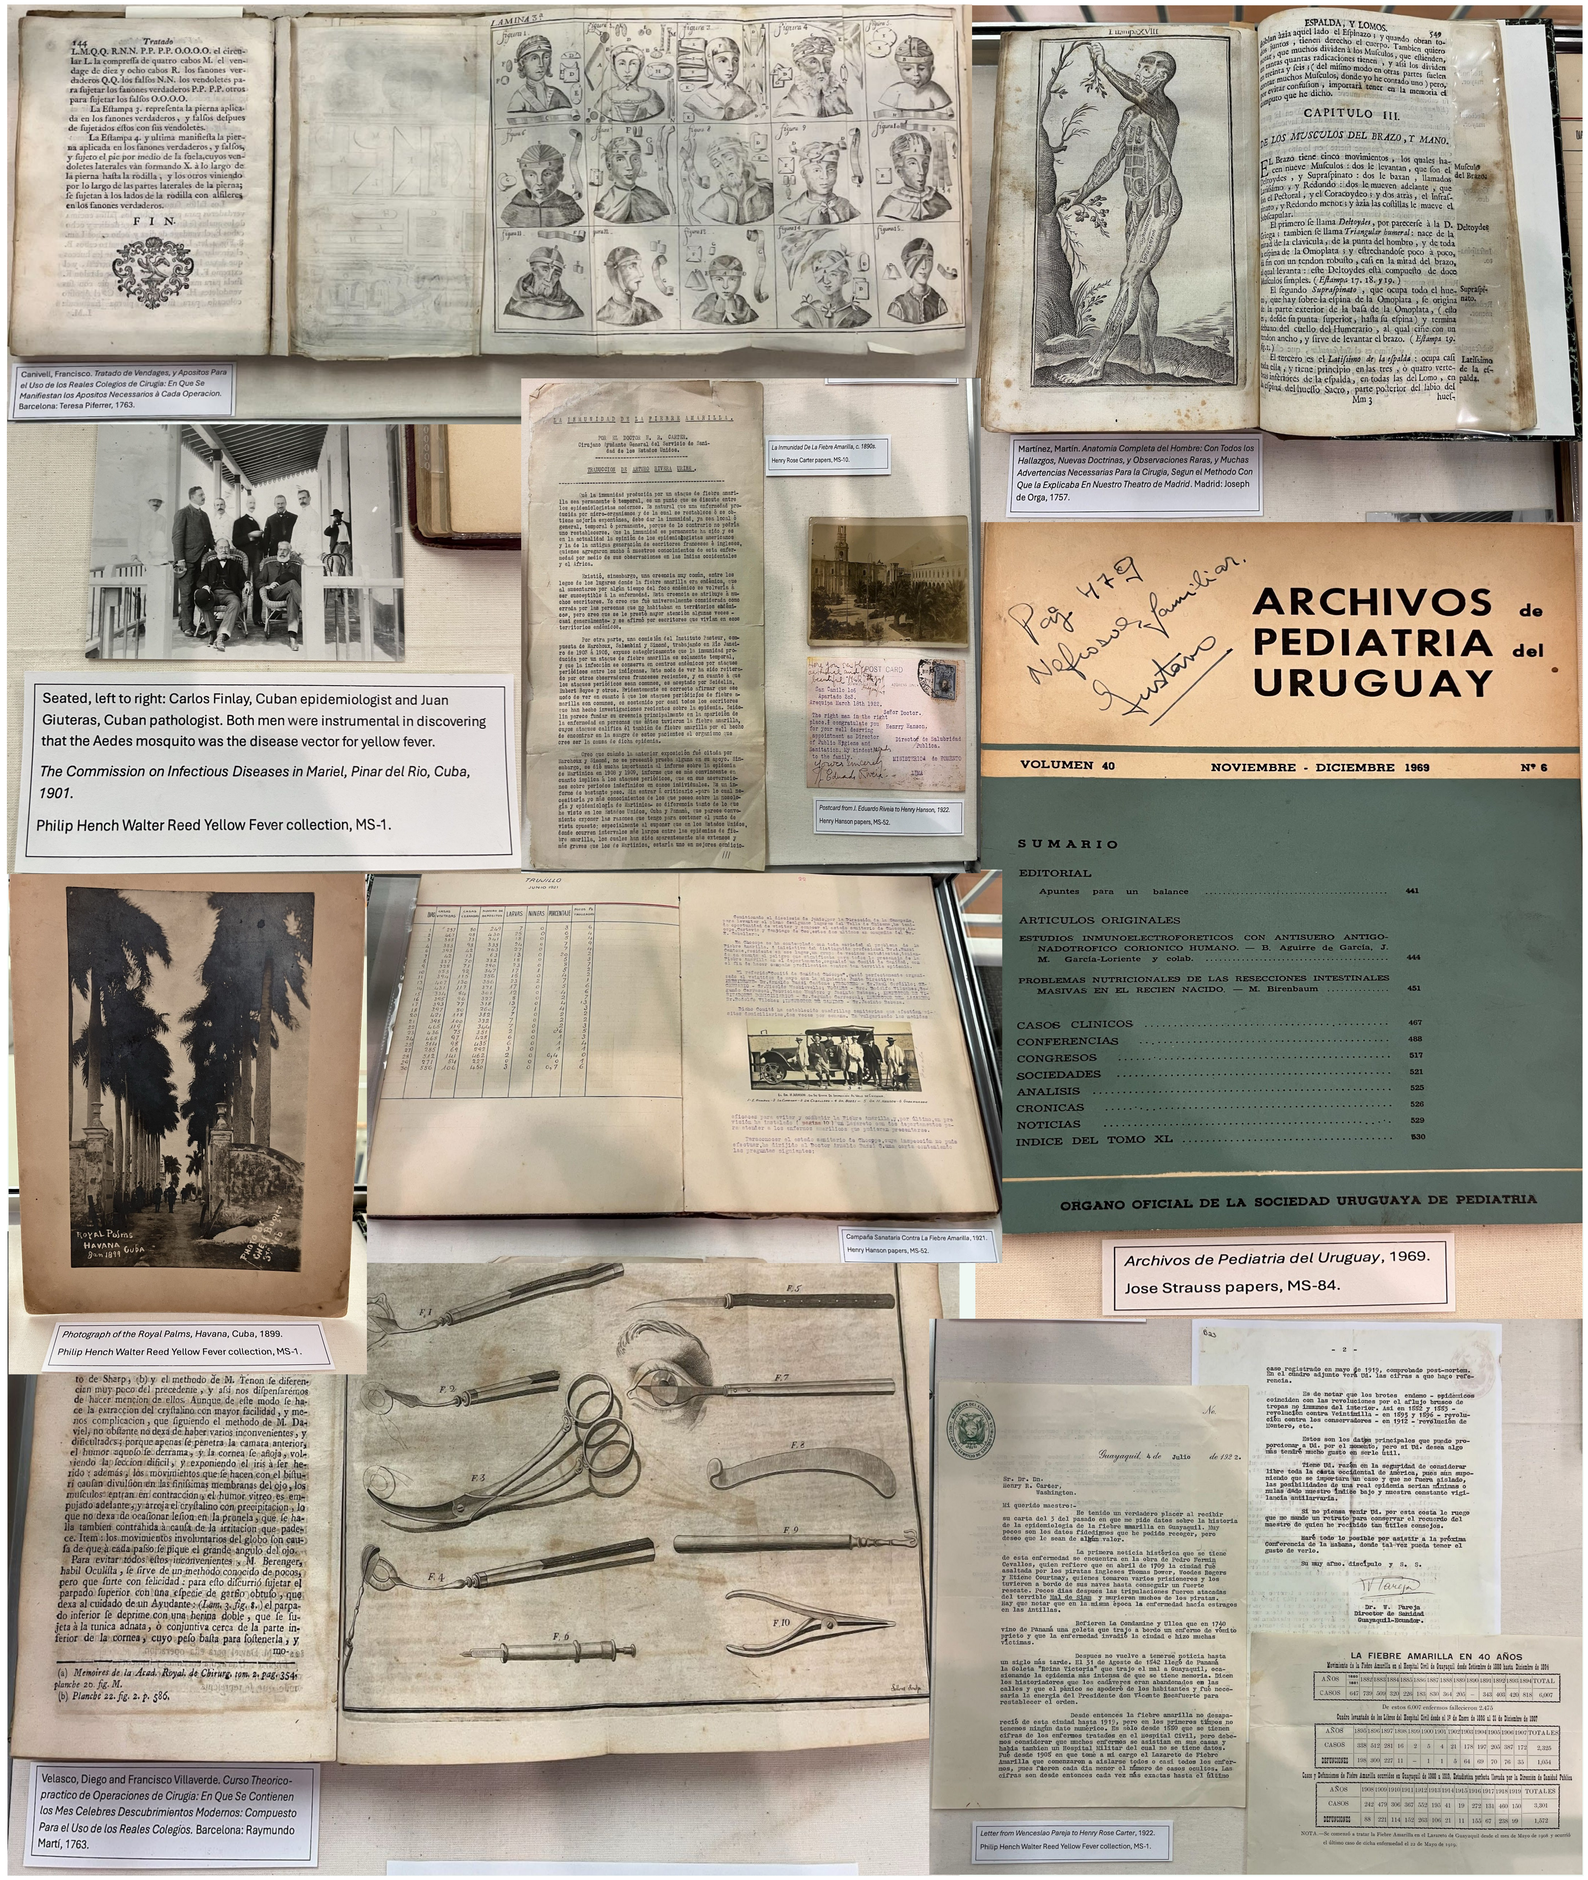
- 3 rare books focusing on anatomy, bandaging techniques, and surgical operations from 1757 and 1763 created by Spanish physicians
- Photographs and letters from the Philip Hench Walter Reed Yellow Fever collection (MS-1) and the Henry Rose Carter papers (MS-10). Items were created by Ecuadorian, Cuban, and Peruvian doctors
- A 1969 Uruguayan medical journal from the Jose Strauss papers (MS-84)
- A scrapbook (1921) and postcard (1922) describing the yellow fever epidemic in Peru from the Henry Hanson Papers (MS-52)

Valuable Insights

- More thorough understanding of Spanish-language collection materials and items created by Hispanic individuals
- Concurrent reference inquiries during curation uncovered relevant materials in other collections not previously discoverable
- Finding aids remediated to reflect materials in Spanish and by Hispanic individuals
- Increased engagement with the Spanish program, UVA student language houses, and Hispanic/Latinx student services via marketing efforts

Mi Admiración y Respeto: Honoring Hispanic Figures in Medical and Scientific History

In celebration of National Hispanic Heritage Month, Historical Collections & Services at the Claude Moore Health Sciences Library presents *Mi Admiración y Respeto: Honoring Hispanic Figures in Medical and Scientific History*. This exhibit recognizes the achievements and contributions made by Hispanic individuals in medicine and science since the 18th century. Featuring items from our rare book and manuscript collections, the display honors the enduring legacy of these remarkable individuals who have inspired success and innovation in their fields.



Carivell, Francisco. *Tratado de Vendages, y Apositos Para el Uso de los Reales Colegios de Cirugia: En Que Se Manifiestan los Apositos Necessarios á Cada Operacion.* Barcelona: Teresa Piferrer, 1763.

Martinez, Martín. *Anatomia Completa del Hombre: Con Todos los Hallazgos, Nuevas Doctrinas, y Observaciones Raras, y Muchas Advertencias Necessarias Para la Cirugia, Segun el Methodo Con Que la Explicaba En Nuestro Theatro de Madrid.* Madrid: Joseph de Orga, 1757.

Seated, left to right: Carlos Finlay, Cuban epidemiologist and Juan Giuteras, Cuban pathologist. Both men were instrumental in discovering that the Aedes mosquito was the disease vector for yellow fever.

The Commission on Infectious Diseases in Mariel, Pinar del Rio, Cuba, 1901.

Philip Hench Walter Reed Yellow Fever collection, MS-1.

La Inmunidad De La Fiebre Amarilla, c. 1890s.
Henry Rose Carter papers, MS-10.

Postcard from J. Eduardo Rivela to Henry Hanson, 1922.
Henry Hanson papers, MS-52.

Campaña Sanataria Contra La Fiebre Amarilla., 1921.
Henry Hanson papers, MS-52.

Archivos de Pediatria del Uruguay, 1969.
Jose Strauss papers, MS-84.

Photograph of the Royal Palms, Havana, Cuba, 1899.
Philip Hench Walter Reed Yellow Fever collection, MS-1.

Velasco, Diego and Francisco Villaverde. *Curso Theorico-practico de Operaciones de Cirugia: En Que Se Contienen los Mes Celebres Descubrimientos Modernos: Compuesto Para el Uso de los Reales Colegios.* Barcelona: Raymundo Martí, 1763.

Letter from Wenceslao Pareja to Henry Rose Carter, 1922.
Philip Hench Walter Reed Yellow Fever collection, MS-1.
